

1.6 DIFFERENT FORM OF WORDS

1. Basic Concepts

1. Demonstrate how word formation occurs with examples.

Answer: Word formation occurs through adding prefixes, suffixes, converting words, and forming compounds.

(CO1 - BTL 3 - Applying)

2. Classify the four types of word formation and provide examples.

Answer:

- Prefixation (e.g., "unhappy")
- Suffixation (e.g., "happiness")
- Conversion (e.g., "run" as noun & verb)
- Compounding (e.g., "blackboard")

(CO1 - BTL 4 - Analyzing)

3. Differentiate between derivational and inflectional word formation.

Answer:

- Derivational: Creates a new word (e.g., "happy" → "happiness")
- Inflectional: Alters grammatical function (e.g., "run" → "running")

(CO1 - BTL 4 - Analyzing)

2. Word Formation by Adding Prefixes

4. Illustrate the concept of a prefix with examples.

Answer: A prefix is added to the beginning of a word to change meaning.

- "dis-" in "disagree"

- “pre-” in “preview”
(CO1 - BTL 3 - Applying)

5. Analyze the transformation in Practical → Impractical.

Answer: Prefix “im-” negates “practical,” forming a new word.

(CO1 - BTL 5 - Evaluating)

6. Generate a word using a prefix that conveys a negative meaning.

Answer: “Honest” → “Dishonest”

(CO1 - BTL 6 - Creating)

3. Word Formation by Adding Suffixes

7. Demonstrate how a suffix modifies a word's meaning with an example.

Answer: Adding “-ness” to “kind” forms “kindness” (adjective to noun).

(CO1 - BTL 3 - Applying)

8. Examine the changes in Inform → Information → Informative.

Answer:

- “Inform” + “-ation” → “Information” (noun)
- “Information” + “-ive” → “Informative” (adjective)

(CO1 - BTL 4 - Analyzing)

9. Propose a suffix that transforms a verb into a noun.

Answer: The suffix “-ion” (e.g., “Decide” → “Decision”).

(CO1 - BTL 3 - Applying)

10. Evaluate the transformation in Profit → Profitable.

Answer: Suffix “-able” forms an adjective indicating capability.

(CO1 - BTL 5 - Evaluating)

4. Word Formation by Conversion

11. Interpret the meaning of conversion in word formation.

Answer: Conversion changes a word's grammatical function without altering form.

(CO1 - BTL 4 - Analyzing)

12. Formulate a sentence using an adjective as a noun.

Answer: "The rich help the poor."

(CO1 - BTL 6 - Creating)

13. Modify the noun "beauty" into a verb.

Answer: "Beauty" → "Beautify"

(CO1 - BTL 3 - Applying)

14. Generate an adjective from the noun "finance."

Answer: "Finance" → "Financial"

(CO1 - BTL 6 - Creating)

15. Analyze the conversion in: "He texted me about the meeting."

Answer: The noun "text" is used as a verb without any change.

(CO1 - BTL 5 - Evaluating)

5. Word Formation by Forming Compound Words

16. Construct a definition for compound words with an example.

Answer: A compound word joins two words to create a new meaning (e.g., "blackboard").

(CO1 - BTL 6 - Creating)

17. Assess the word formation process in "cupboard."

Answer: A compound word formed from "cup" + "board."

(CO1 - BTL 5 - Evaluating)

18. Construct a compound word using "sun" and "rise."

Answer: "Sunrise"

(CO1 - BTL 3 - Applying)

19. Examine the word formation process in “underestimate.”

Answer: It is formed by compounding the preposition “under” with the verb “estimate.”

(CO1 - BTL 4 - Analyzing)

20. Create a hyphenated compound word.

Answer: “Well-known”

(CO1 - BTL 6 - Creating)

6. Additional Applications and Analysis

21. Evaluate how the word “waste” changes to “wasteful.”

Answer: The suffix “-ful” forms an adjective from a noun.

(CO1 - BTL 5 - Evaluating)

22. Modify the adjective “slow” into an adverb.

Answer: “Slow” → “Slowly”

(CO1 - BTL 3 - Applying)

23. Differentiate between affixation and compounding.

Answer:

- Affixation: Uses prefixes/suffixes (e.g., “hope” → “hopeful”).
- Compounding: Joins words (e.g., “tooth” + “brush” = “toothbrush”).

(CO1 - BTL 4 - Analyzing)

24. Develop an example that includes both conversion and affixation.

Answer: “Decide” (verb) → “Decision” (noun)

(CO1 - BTL 6 - Creating)
